## ABOUT ME

I always knew that working on creating digital content gave me a profound sense of purpose and connection to the world. What sets my work apart is the infusion of emotions into my design process.

## SKILLS

- Teamwork (Duo, 5-6 people)
- Creativity
- Critical thinking
- Problem solving
- Communication

## EXPERIENCE

Some of the brands I worked with:

6 MONTHS

6 MONTHS

8 WEEKS

6 MONTHS

## UX/UI Design

- What makes a product significant and genuinely useful is the quality of the design thinking put behind it. I have experience working with The 5-step design process, Minimum Viable Product triangle, DOT framework, CMD methods, and Double Diamond. Additionally, I also engage in:
- **Research**(A/B testing, Concept validation, usability testing, Three/ Scenario testing, Card sorting, Brand testing etc.)
- **Prototyping**: Mock-ups, Wireframes, High/Low fidelity
- **Prototyping tools**: Figma, Adobe XD, Axure

## Web Developement

To me, coding is fun when I can visually see what is changing on the screen. That's why I stuck with front-end development and built a couple of projects using:

- HTML, CSS, JavaScript
- React, Node.js, Express.js
- PWA

You can see my GitHub here: <https://github.com/workgit-code>

## EDUCATION

September 2020 - May 2024

**Fontys University of Applied  
Sciences ICT & Media Design**
